Test Objective	Verify successful login
Test Type	System Testing
Test Technique	Black Box Testing
Priority	High
Severity	Critical

Preconditions	Instagram app is installed and user is registered
Postconditions	User reaches Home Feed
Test Environment	Android 14
Browser/OS	Android / Instagram App
Test Data	Username: divyanshi01 Password: Insta@123
Expected Result	Login Successful
Actual Result	Login Successful
Status	Pass

- # Conclusion and Recommendations :

Pass Rate: 90% – Needs Improvement

Issues Found and Their Solutions

1. Improve Reels Loading Speed

Optimize the Reels feature to reduce loading time and buffering, especially on slow internet connections.

2. Better Search Accuracy

Improve the search algorithm so that user profiles, hashtags, and posts appear faster and with more relevant results.

3. Enhance Story Upload Performance

Reduce the time taken to upload photos and videos to Stories and display upload progress more clearly.

4. Strengthen Notification System

Ensure likes, comments, messages, and follow notifications are delivered instantly without delays.

5. Improve Login & Account Recovery

Make the "Forgot Password" option more accessible and simplify the account recovery process with clear instructions.
